Storage

4.6 KB of about 500 KB used. Up to 150 applications; new records are refused before the platform limit is hit.

Visitor statistics are intentionally not shown: this portal does not track visits, so any number would be invented.

Settings

Stored in Script Properties and effective immediately; no redeployment needed.

Security code for opening applications

When on, visitors must enter this 4-digit code before any application set to "Follow the portal-wide setting" opens. Each application can instead use its own code, or no code, from Edit application. Codes are stored hashed and cannot be shown again; set a new one if it is forgotten.

☐ **Require a security code for all applications**

Administrators

You are the primary administrator (account owner). Primary administrators can add or remove secondary administrators. 1 of 10 secondary administrators used.

Add an administrator

Email address

name@company.com

An invitation code is emailed to this address. The person opens Admin Login, chooses "Join here", and creates their own password.

+ Add and send invitation

Who can sign in to the admin portal

valobvb30@gmail.com Primary (owner)
Can do everything, including making other administrators primary.

Activity log

Newest first. Passwords, hashes and session tokens are never recorded. The log keeps at most 150 entries (fewer if they exceed the storage budget); older entries are discarded automatically.
